- **stakeholder involvement:**
For a successful implementation of (pilot) activities and for achieving durable results and political sustainability the integration of local, regional and national stakeholders will be of major importance in all stages of the project cycle. Bringing together those stakeholders, who are necessary for the successful implementation of the project activities and the operation of the developed services after the end of the project
- measures for stakeholder involvement, training and awareness raising about the necessity to develop sustainable mobility along the Danube beyond the project partnership .
- complemented by addressing the transnational as well as EU-Level in order to disseminate results of the project, communicate common policy recommendations and further support the Danube Strategy process.
- Evaluate and monitor project outputs and results within the partnership but also by the stakeholders interested and responsible on the local, regional, national and transnational level
